

TOKYMAKER UPDATE

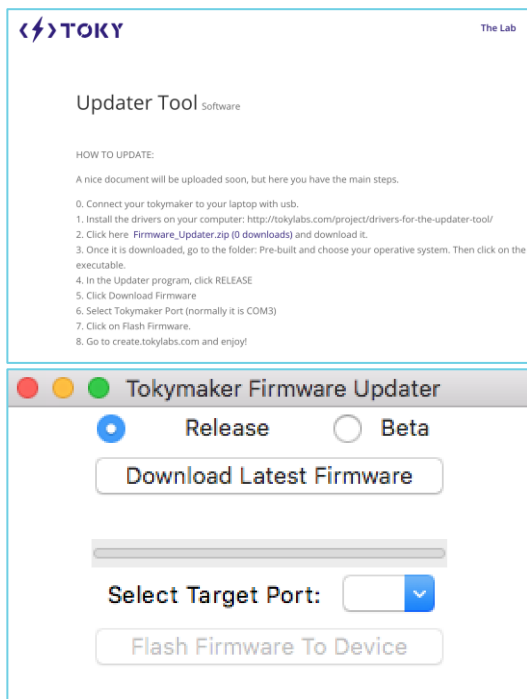

Download driver

Go to <https://tokylabs.com/downloads/>, go to page “software” download the “Drivers for the updater tool” and install the driver on your computer.

Connect

Connect your Tokymaker to your laptop with USB.

Download updater

Go to <https://tokylabs.com/downloads/>, go to the page “software” and download the “Firmware update” Of your operative system.

Once it is downloaded, click on the executable.

In the Updater program:

- Click “RELEASE”
- Click “Download Latest Firmware”
Select the Target Tokymaker Port (normally it is COM3 for WINDOWS and /dev/cu.wchusbserial1410 or /dev/cu.wchusbserial1420 for MAC)
- Click on Flash Firmware

After this your Tokymaker is updated to the latest version. Go to create.tokylabs.com and enjoy!
